

# AMR-OP70C/xx

Programmable on-wall controller

- **LCD monochrome graphical display**
- **Touch screen**
- **Communication interface RS485**
- **Room temperature measurement**
- **CO<sub>2</sub> concentration measurement**
- **Acoustic signalisation (application driven)**
- **On-wall mounting**
- **Power supply 24 V DC**

## TECHNICAL DATA

|   |  |
|---|--|
| <b>Display</b>                                  | Graphical monochrome LCD   |
| Resolution                                      | (64 × 132) pixels (asymmetric point)   |
| Display area                                    | (58 × 38) mm   |
| Backlight / lifetime                            | LED / min. 50 000 hours <sup>1)</sup>  |
| <b>Temperature measurement</b>                  | Semiconductor sensor   |
| Measurement range                               | -55 °C to 125 °C <sup>2)</sup>   |
| Measurement accuracy                            | ±2 °C (-55 °C to 0 °C)<br>±0.5 °C (0 °C to 50 °C)<br>±2 °C (50 °C to 125 °C) |
| Settling time                                   | 45 min. <sup>3)</sup>  |
| <b>CO<sub>2</sub> concentration measurement</b> | NDIR   |
| Measurement range                               | 400 ppm to 3000 ppm  |
| Measurement accuracy                            | ±150 ppm   |
| Settling time                                   | 90 s   |
| <b>Acoustic signalisation</b>                   | Piezo  |
| <b>Control</b>                                  | Resistive touch panel  |
| <b>Communication</b>                            | RS485  |
| Galvanic isolation                              | No   |
| Number of devices on RS485 segment              | 256  |
| <b>Power supply</b>                             | 10 V DC to 30 V DC   |
| Maximum power consumption                       | 40 mA at 24 V DC   |
| <b>Others</b>                                   |  |
| Connection points                               | CHF5/2 terminal  |
| Ingress protection rate                         | IP20   |
| Operating temperature range                     | -10 °C to 50 °C  |
| Maximum ambient humidity                        | < 95 %, non-condensing   |
| Mounting  | On the wall  |
| Weight  | 0.10 kg  |
| Dimensions (w × h × d)                          | (90 × 90 × 32) mm  |
| <b>Programming</b>                              | DetStudio / EsiDet   |

<sup>1)</sup> Luminance drop to 50 %.

<sup>2)</sup> Sensor characteristic, the operating temperature range of on-wall controller is lower.

<sup>3)</sup> Time from power-up, in this time, the accuracy of measurement is reduced to ±2 °C.

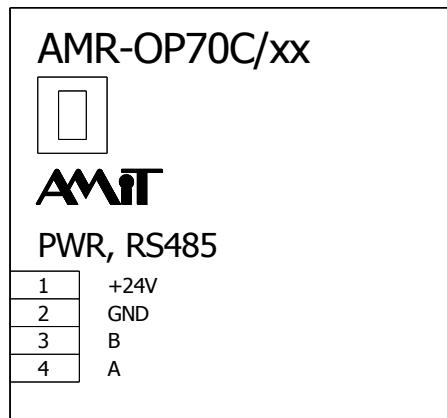

## ORDERING INFORMATION

|              |                    |
|--------------|--------------------|
| AMR-OP70C/xx | On-wall controller |
|--------------|--------------------|

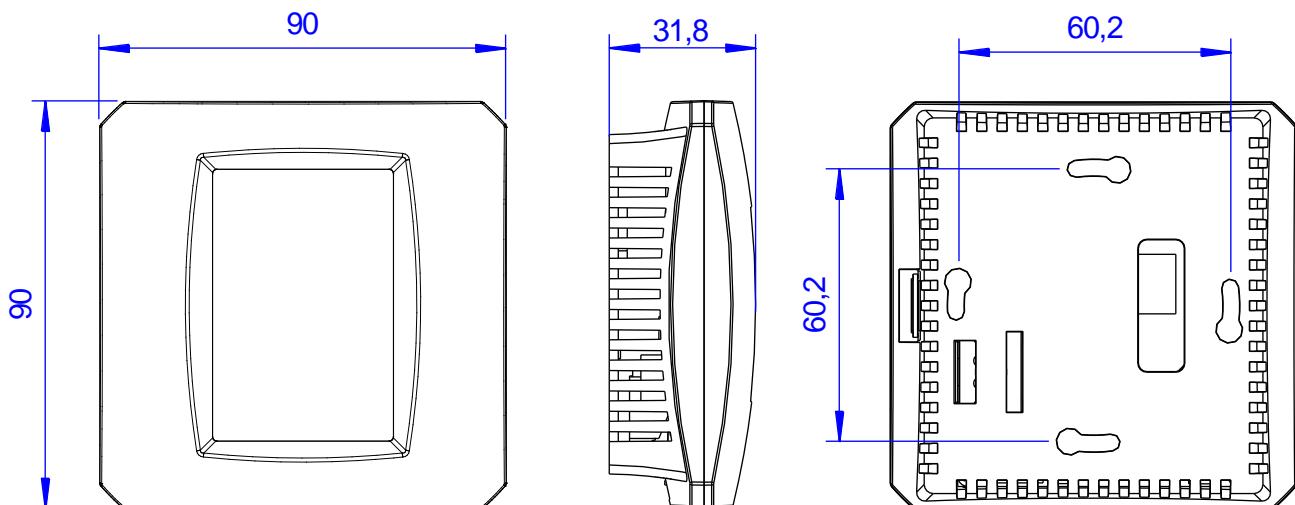

|                     | Colour of the tub |          | Colour of the cover |          |
|---------------------|-------------------|----------|---------------------|----------|
| <b>AMR-OP70C/01</b> | gray              | RAL 7005 | white               | RAL 9003 |
| <b>AMR-OP70C/02</b> | ivory             | RAL 1013 | ivory               | RAL 1013 |
| <b>AMR-OP70C/03</b> | gray              | RAL 7005 | gray                | RAL 7005 |
| <b>AMR-OP70C/04</b> | white             | RAL 9003 | white               | RAL 9003 |

Note: Small depressions at the surface and colour inhomogeneity are not grounds for warranty claim.

# AMR-OP70C/xx

Programmable on-wall controller

## RS485 CONFIGURATION JUMPERS

Each unit on communication line RS485 must have correctly set termination resistor. To set the termination, the configuration jumpers located beside the RS485 connector are used. If the configuration jumpers are set, the termination is connected. The terminal stations on the line must always have connected the termination, continuously disconnected.

| Jumper | Meaning                           |
|--------|-----------------------------------|
| J10    | Idle state + Signal A termination |
| J11    | Idle state + Signal B termination |
