

# Communication line converters

- different interfaces supported
- reliable and verified converters for industrial automation
- converters of RS485 line
- GSM and GPRS modem
- communication converters with integration into MODBUS, ARION networks
- remote data reading over M-Bus
- MP-Bus and OpenTherm converter
- Ethernet switches
- mounting on a 35 mm DIN rail

AMIT, spol. s r.o.

### DM-232T0485

Converter RS232 to RS485  
 Transmission speed  
 0 Bd to 115 kBd  
 Automatic or controlled transmission direction  
 Power supply 24 V DC  
 (36 × 91 × 73) mm

### DM-OT2

Converter OpenTherm to RS485  
 MODBUS RTU / ARION protocol  
 OpenTherm/plus (OT+) specification  
 Power supply 24 V DC  
 (54 × 92 × 61) mm

### DM-MPBUS2

Converter MP-Bus to RS485  
 MODBUS RTU / ARION protocol  
 Master on MP-Bus, control of up to 8 servo drives on a single bus  
 Power supply 24 V DC  
 (54 × 92 × 61) mm

### DM-MBUS64

Converter M-Bus to Ethernet/RS232  
 Ethernet – APE, Direct, MODBUS TCP  
 RS232 – Direct, MODBUS RTU protocols  
 Master-type M-Bus interface, max. 64 slave units  
 Power supply 24 V DC  
 (106 × 100 × 62) mm

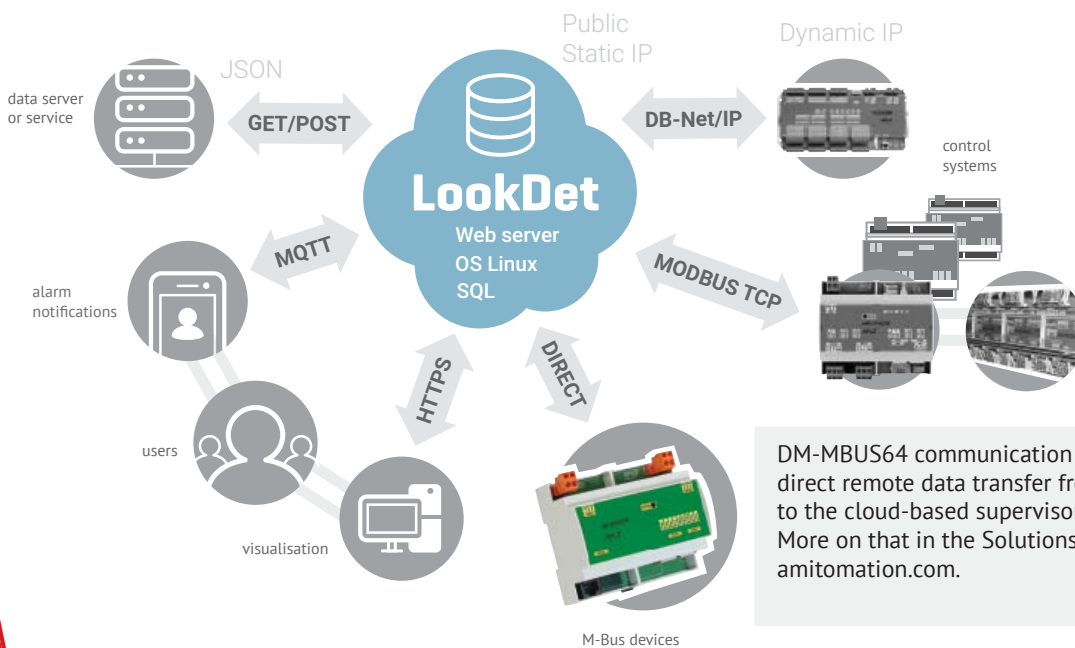

### DM-GSM3

RS232 Modem for GSM/GPRS network  
 Bands 900/1,800 MHz  
 Data / SMS  
 Power supply 24 V DC  
 (36 × 95 × 73) mm

### DM-ESW05

5-port industrial Ethernet switch  
 Speed 10/100 Mbps  
 Communication indication  
 Power supply 24 V DC  
 (54 × 92 × 61) mm

DM-MBUS64 communication converters allow direct remote data transfer from M-Bus meters to the cloud-based supervisory system LookDet. More on that in the Solutions section at [amitautomation.com](http://amitautomation.com).
